

Rose Bulgaria

Rosa damascena

ESSENTIAL OIL

ABOUT DAMASK ROSE

The origin of the Damask rose is still enshrouded in mystery, with speculation that it is from Asia Minor or the Middle East. It takes its name from the city of Damascus, the capital of Syria. Today, three countries are best known for cultivating this rose and producing its essential oil or absolute: Turkey, Bulgaria, and Morocco.

The Damask rose was introduced into Bulgaria in the 17th century. Since then it has thrived in the center of the country, in the valley of Kazanlak, known as «Rose Valley», recognized around the world. The rose has become so important in this country that it has been designated as a national emblem.

Like many flowers, roses are fragile and are harvested at dawn. The early hours of the morning provide much-needed humidity for picking the just opening roses. The harvesting period lasts about 20 days.

These applications are given for information only

FLORAL Rosy

THE FRAGRANCE

The rose is known as the queen of the flowers and is an essential raw material of perfumery. It is also an essential ingredient in the chypre accord. Its essential oil is generally used to strengthen a rosy reconstitution in a soliflore accord or in a floral bouquet.

WELL-BEING APPLICATIONS*

Healing, astringent, skin tonic, anti-aging, neurotonic. Emotional harmonizer, brings well-being and inner peace, essential oil of consolation and love, it can also be an aphrodisiac when there is doubt about femininity.

GLOBAL DATA

CAS TSCA: 8007-01-0

CAS EINECS: 90106-38-0

EINECS : 290-260-3

FEMA: 2989

FDA: 182.200

CoE: 405n

INCI: Rosa damascena flower oil

Resource: Cultivated

Processed plant part: Flowers

Transformation process: Distillation

Appearance: Light yellow to yellow liquid

Main constituents: Citronellol, géraniol, nérol, n-paraffines

Active constituents: Citronellol, geraniol, nerol
